

Caterline-forme 227 x 178 x 50 mm Sort 2-Rum, 216 Stk/kart (1 x 216 Stk)

PP Cater Line-serien er klassiske bakker, der kan forsegles og er velegnet til alle typer af mad, både varmt og koldt. De findes i flere dybder og med forskellige antal rum og fås i både sort, hvid og gennemsigtig. Afhængigt af dine konkrete behov kan bakkerne enten forsegles med en forseglingsfilm eller lukkes med et låg. Hvis du ønsker at forlænge holdbarheden, er bakkerne også velegnede til pakning i beskyttende atmosfære.

PP -20°C til +120°C

Temp (Tid): +120°C (1h), +100°C (2h), +70°C (4h), +40°C (10dage), -20°C (ubegrænset)

- Bakker forsegles med vores unikke Duniform-koncept
- Bakker er passende til modificeret atmosfæreemballage (Modified Atmosphere Packaging – MAP)
- Låg med fremragende stabelbarhed

Artikeloplysninger

Artikelnummer	160064
Mærke	DUNI
Undermærke	DUNIFORM®
Materialekvalitet	PP
Oprindelsesland	Belgien
Sæson	Året rundt

Fødevaregodkendelse	✓
Forseglbar	✓

Certificeringer

Tilbehør

171200

Låg til Caterline -forme

ENVIRONMENTAL AND PRODUCT INFORMATION SHEET

Product

PP-trays

Material

Polypropylene (PP) 95 %

Mineral 5%

Packaging

Inner: Polyethylene (PE)

Outer: Corrugated board

Field of Application

The product may be used safely with all types of food in the microwave and under following conditions:

Temp (Time): +120°C (1h), +70°C (4h), +40°C (10days), -20°C (unlimited)

EC Directive 94/62/EC on Packaging and Packaging Waste

The packaging complies with all essential requirements as defined by 94/62/EC.

For example, minimum adequate amount of packaging, limitation of heavy metal content, recyclable through at least one of the following: reuse, material recovery, energy recovery or composting.

Environmental Aspects

Product

Polypropylene is produced by refining of mineral oil or natural gas.

Packaging

PE is manufactured from mineral oil or natural gas.

The corrugated board is unbleached and to a large extent made from recycled fibres.

Product Safety

The products fulfill the following:

- EU Regulation 1935/2004/EC
- EU Regulation 2023/2006/EC
- EU Regulation 10/2011/EC with amendments.
Migration tests on the article material performed by an independent institute showed that under appropriate test conditions, overall and specific (when relevant) migration falls considerably below the limit given by regulation 10/2011. (For further details, see *Declaration of Compliance*).
- Duni manufacturing units are certified according to the international quality system ISO 9001 and environmental system ISO 14001 as well as to BRC for hygiene.

Management of Used Products

Energy Recovery

All the materials are suited for energy recovery. Complete combustion gives mainly rise to carbon dioxide and water. The energy content of plastics/paper is comparable to that of oil/ wood.

Recycling

Recycling of the plastic and the corrugated board is possible for producing new products. However, recycling depends on collection, sorting and general material acceptance. Always consult with a local waste handler for recycling recommendations.

Validity

This is a copy of a document issued 2021-11-03. It is normally updated every second year or when there is a change in the manufacturing process, in the product or in legislation. To make sure that you have the latest edition, contact Duni AB, Environmental Affairs.
